SCHEDULE

27 November
Chalmers Kemientrén

09:45 - 10:00 Opening ceremony

10:00 - 16:00 Fair is open

The Banquet

On the evening after the fair a Banquet will be held.

This occasion is for you to mingle and make conversation with the corporate representatives in a more relaxed environment. After spending the day networkning, this is an excellent opportunity to make a final impression or just get more inspiration and ideas from people involved in your desired business.

For more information visit our Facebook page

Ernst & KARG.

TIPS

Remember the companies at KARM are here to meet YOU, as you may be their future employee.

Be prepared and think of what you want to achieve during the fair. Is your goal to find a summer job, a thesis work or do you simply want to get inspired?

Take some time to find information about the companies you are interested in and prepare questions. With some prior knowledge you can make a great impression and get more out of KARM.

In line with Chalmers policy we expect both exhibitors and visitors to behave equally against all genders. If you have any questions or feel unequally treated, please contact the organizers during the fair or send an email to ordf@ernstkarg.se

ERNSTOCHKARG
KEMISEKTIONERNAS ARBETSMARKNADSGRUPPER

THE ORGANIZERS

Ernst & KARG are the chemical and biological labour groups at Chalmers University of Technology.

Our primary mission is to promote cooperations and exchanges between the students and the labour market.

Our aim is to create events where students and companies can meet. We hope to give the students inspiration and insight to their future careers. In addition to the career fair KARM, we also organize field trips, lunch lectures and dinners where students and companies can meet and operate a mentorship program. We also manage the main responsibility for the sponsors agreements on the sections. In short, we function as a link between the students and the labour market.

WELCOME TO KARM 2019!

It is finally time for this year's KARM - the career fair for the chemical engineering programmes! At the fair you will have the chance to network with companies and organizations, listen to inspiring presentations and so much more.

Make sure to take this opportunity!

Best regards
Ernst & KARG

ERNSTOCHKARG
KEMISEKTIONERNAS ARBETSMARKNADSGRUPPER

OUR PROGRAMMES

K

300 hp
Chemistry
technology

A five-year chemical engineering programme as well as the largest of our four programs. The programme focuses on process technology and the range of courses includes a lot of chemical engineering and mathematics, but also traditional chemistry, such as materials chemistry and analytical chemistry. Many students choose to focus on either process and energy technology or materials chemistry.

Ki

180 hp
Chemistry
technology

A three-year programme which gives a good foundation in chemical engineering, both practical and theoretical. The practical elements are of great importance, since the focus is to learn the techniques that will be used in professional life. The range of courses includes chemistry and mathematics as well as chemical engineering, but also courses in environment, economics and communications.

Kf

300 hp
Chemistry and
physics
technology

A five-year chemical engineering programme unique to Chalmers that aims to educate engineers with large computational and problem-solving expertise in the chemical engineering field and at the interface between physics and chemistry. The programme is based on joint studies with both Chemical Engineering and Applied Physics. Compared to Chemical Engineering (MSc) the course range consist of equally many chemical engineering courses, but significantly more mathematics and physics and less traditional chemistry.

Bt

300 hp
Biotechnology

A five-year chemical engineering programme with a distinct biotechnological profile. The range of courses includes chemistry, biotechnology and mathematics but also biochemistry, cellular and molecular biology, as well as a chemical engineering knowledge base. The programme is partly theoretical but also partly practical with a lot of experimental and laboratory work. Common specializations are biotechnology, biomedicine and materials chemistry.

We invest in people because
people equals knowledge

Vi är experter på kemiska lösningar för världens pappers- och massaindustri. Hemligheten bakom våra framgångar är inte enbart ett resultat av långsiktiga investeringar i forskning och utveckling, eller ett nära samarbete med universitet och högskolor. Lika viktigt är att vi har kompetenta och drivna medarbetare med passion för att skapa innovativa, hållbara och lönsamma lösningar som hjälper industrin att möta sina utmaningar – nu och i framtiden.

About us

BIM Kemi AB manufactures green chemistry for the paper and pulp industry. The company is a family business that was started in 1973. The head office is in Stenkullen outside Gothenburg, where you will also find production, lab and R&D. BIM also has local units in Norway, Finland, Poland, England, Germany, Belgium, the Czech Republic, Spain, Portugal, France and South Africa, and works with agents and distributors in more pulp and paper-producing countries. The values in BIM are commitment, creativity and innovation. The strategy is customer proximity. At BIM we think differently. To be even better, we dare to try new ways and innovative solutions in close cooperation with our customers.

Growing ideas, growing our business and growing you

We can only be such a high-performing company because we are ambitious. We unite forward-thinking people to promote progress that ultimately grows our business and changes our industry for the better.

A CAREER IN BORREGAARD

Borregaard has one of the world's most advanced and sustainable biorefineries. By using natural, sustainable raw materials, Borregaard produces advanced and environmentally friendly biochemicals and biomaterials that can replace oil-based products. Borregaard also holds strong positions within ingredients and fine chemicals.

Borregaard has 1100 employees in plants and sales offices in 16 countries throughout Europe, Americas, Asia and Africa.

Borregaard places a significant emphasis on research and development and has large and innovative research divisions in organic chemistry and wood chemistry. 100 employees work in R&D, of which 65 employees at the R&D centre in Norway.

About us

Are you interested in working part time as a consultant within your field of study? Chalmers Teknologkonsulter is a student consulting firm owned by the Chalmers Student Union and our goal is to provide you the opportunity to develop professionally within your field of study before graduation, create valuable contacts and relations in the industry as well as getting valuable work experience. These are some of the key factors companies look for when they hire new employees and thus will enable you to get a head start in your professional career. Come by our booth and we will gladly tell you more about how working as a consultant while studying is so great!

YOUR POTENTIAL

COWI är ett ledande teknikkonsultföretag med tusentals projekt över hela världen. Vi erbjuder kvalificerade konsulttjänster inom industri, infrastruktur, byggnad & fastighet, miljö, projektledning och CAD/IT.

Hos oss får du chansen att utvecklas genom den stora variationen projekt, samarbeten över teknik- och landsgränser och i vår egen COWI Academy. Vi är alltid intresserade av nya kollegor. Kanske är just du en av dem vi söker!

About us

INOVYN is a leading chemical company with more than 4300 committed employees that contributes to the success of the company in ten countries across Europe, 300 of these employees are located at INOVYN Sweden in Stenungsund. INOVYN is at the heart of Europe's chemical industry, our products find use in almost every aspect of modern society, keeping people housed, healthy and connected. INOVYN manufactures a wide range of chemicals that are used as raw materials in almost every industrial process. Our portfolio is based on the key products; organic chlorine derivatives, chlor alkali and vinyls. We believe INOVYN is a refreshing place to work and we are prepared to embrace new approaches to business. We are highly focused on growth and have many planned investments in Sweden. Our number one priority is safety, health, environment and everyone can make a difference.

Ready for a jump start?

Are you passionate about sustainability, innovation, safety, and collaboration?

Nouryon is the new name of AkzoNobel Specialty Chemicals. Industries worldwide rely on our essential chemistry in the manufacture of everyday products such as paper, plastics and personal care items. Our employees have ideas on how to build a sustainable future and the drive and passion to realize them. They believe that building long-term relationships and integrity are keys to success. If that describes you, we will gladly make way for your ambitions.

About us

Preem is an important player in the conversion to renewable fuels. Our vision is to lead the transition towards a sustainable society. This means that we consider the future as our most important market and the journey to a sustainable society as one of our most important issues.

Preem is the largest fuel company in Sweden, with a refining capacity of more than 18 million m³ of crude oil every year. We refine and sell gasoline, diesel, heating oil and renewable fuels to companies and consumers in Sweden and abroad.

Sveriges Ingenjörer

Ditt liv som ingenjör börjar nu!

Sveriges Ingenjörer ger dig möjlighet att börja forma din framtida ingenjörskarriär redan före examen, tack vare ett unikt nätverk samt en rad tjänster och förmåner anpassade för dig som ingenjörsstudent.

Vi kan din framtida arbetsmarknad

Vi erbjuder träning och stöd inför skarpt läge, till exempel simulerade anställningsintervjuer. Men också karriärcoachning och cv-granskning. Du får även tillgång till ingenjörsspecifik lönestatistik.

Bli studentmedlem i Sveriges Ingenjörer för bara 180 kr/år (15 kr/mån).

About us

Sveriges Ingenjörer - The Swedish Association of Graduate Engineers - has over 153 000 members, all of whom have an academic degree and who support each other. We are a strong union with great dynamism and the resources to be of benefit. We look forward, instead of backwards, and we use modern, new methods to achieve our objectives. The visions of our members lead us step by step towards a better society. It is the engineers' innovative powers that solve our common problems, raise standards, generate growth, and create more jobs along the way. Sveriges Ingenjörer is the only trade union with total focus on engineers. We are constantly working to ensure that our members have; good working conditions, opportunities to develop in their professional roles and, most of all: That they are valued highly by their employers, as well as society.

Framtiden är gjord av träd

Södra bedriver forskning och utveckling för att förbättra dagens produkter och processer. Vi satsar betydande resurser för att kunna placera nya och innovativa produkter på marknaden.

Trä kan ersätta betong,
papper kan ersätta plast och
kläder kan tillverkas av träfiber.

About us

Södra's operations are based on value-creating relationships and long-term actions. The overall task of the owners is to promote forest farm profitability through advice and support for responsible and sustainable forestry and to contribute to a market return on forest raw material. Most of the wood is processed in our own industries for sawn and planed timber products, wood building systems, pulp and biofuel. 80 per cent of the wood raw material for our sawmills and pulp industries comes from Södra's members. We have one of Sweden's largest sawmill operations and are one of the largest producers in Europe of softwood pulp for the barley market. Södra also manufactures dissolving pulp of deciduous trees. Our three pulp mills have virtually a fossil-free production and generate an energy surplus. This bio-based energy is sold, among other things, as green electricity and district heating. We are purposefully investing in innovation to develop new products based on the renewable wood raw material.

Fyra smarta skäl att bli studentmedlem i höst.

BLI MEDLEM IDAG OCH FÅ KRAFTER UTÖVER DET VANLIGA UNDER HELA STUDIETIDEN.

1 Du betalar bara 100 kronor för medlemskapet.

Du betalar bara en gång och det gäller oavsett vad eller hur länge du pluggar. För 100 kronor får du förmåner och tjänster till ett värde av tusentals kronor. Vad sägs om en förmånlig hemförsäkring, rabatt på tidningar, elektronik, resor och exklusiva inbjudningar till några av Sveriges bästa föreläsare? En superdeal för dig som student med begränsat budget.

2 Någon att fråga om allt. Nästan i alla fall.

Vi kanske inte har superkoll på dina tentafrågor, men när det kommer till arbetsliv och karriär kan vi det mesta. Är du osäker på vad som är normalt på extra- eller sommarjobbet, hur ett bra cv ska se ut eller vad du ska begära i ingångslön? Kontakta oss. Vi vet.

3 Vi är störst. Och det tjänar du personligen på.

Unionen är Sveriges största fackförbund för tjänstemän i det privata arbetslivet. På svenska betyder det att de flesta ingenjörer, ekonomer, jurister och chefer som inte jobbar inom kommun eller landsting väljer att bli medlemmar hos oss*. Och ju fler vi blir, desto bättre blir det. Att vara många är liksom hela poängen med facket. Det betyder också att vi finns nästan överallt i svenskt arbetsliv. Därför har vi grym koll, oavsett var du hamnar.

4 Vi har de bästa examenspresenterna.

När du tar examen och uppdaterar ditt Unionenmedlemskap till yrkesverksamt betalar du bara 100 kronor i medlemsavgift första året. Tack vare vår **NY PÅ JOBBET-RABATT** sparar du upp till 2 600 kronor (ord. medlemsavgift är ca 2 700 kronor). När du uppdaterar ditt medlemskap kvalificerar du dig dessutom för vårt **LITTERATURSTIPENDIUM**. Skicka in dina gamla kvitton för kurslitteratur eller annat kursmaterial, så ger vi dig över 3 000 kronor för dina utlägg. Varför? Eftersom kunskap och kompetens är något av det viktigaste vi vet här på Unionen.

Bli medlem idag och läs mer på [unionen.se/student](https://www.unionen.se/student)

*Unionen organiserar bara medlemmar som jobbar på privata företag och organisationer, eftersom det är det vi kan bäst och där vi förhandlar fram anställningsvillkoren. För kommun och stat finns våra systerförbund Vision och ST.

About us

Interested in pursuing a
research-driven career? Whether
in academia or industry, a PhD
degree is a fundamental
requirement for working in
research. There are over 200 PhD
students working at the
Departments of Chemistry and
Chemical Engineering (K) and
Biology and Biological
Engineering (B). Doing a PhD
takes between 4 and 5 years, and
comes with a salary and all the
rights associated with an ordinary
job, even though one is formally
still regarded as a student (and
enjoys the benefits of it).

Valmet is the leading global developer and supplier of technologies, automation and services for the pulp, paper and energy industries. Valmet's vision is to become the global champion in serving its customers. Our 13,000

professionals around the world work close to our customers and are committed to moving our customers' performance forward – every day.

Valmet's services cover everything from maintenance outsourcing to mill and plant improvements and spare parts. The strong technology offering includes pulp mills, tissue, board and paper production lines, as well as power plants for bio-energy production. Valmet's advanced automation solutions range from single measurements to mill wide turnkey automation projects.

THANK YOU!

We would like to thank everyone who made this day possible!

Most of all we want to thank our main sponsor:

Keep Discovering

We would also like to thank all of the other participating companies and our other sponsors:

Nouryon

Last but not least we want to thank all of the students involved!

*We hope you enjoyed
KARM!*
