# **SCHEDULE**

**9:45 - 10:00**

**Opening ceremony**

**10:00 - 16:00**

**Fair is open**

## **Banquet**

On the evening after the fair a Banquet will be held. This is an occasion where you can mingle and make conversation with the corporate representatives in a more relaxed environment. After spending your day networking, this is an excellent opportunity to make a final impression or just get more inspiration and ideas from people involved in your desired business. For more information visit our Facebook page Ernst & KARG.

**We hope to see you there!**

# TIPS

## REMEMBER

The companies at KARM are here to meet YOU, as you may be their future employee.

## BE PREPARED

Think of what you want to achieve during the fair. Is your goal to find a summer job, a thesis work or do you simply want to get inspired?

Take some time to find information about the companies you are interested in and prepare questions. With some prior knowledge you can make a greater impression and get more out of KARM.

In line with Chalmers policy we expect both exhibitors and visitors to behave equally against all genders. If you have any questions or feel unequally treated please contact the organizers during the fair or send an email to [ordf@ernstkarg.se](mailto:ordf@ernstkarg.se)

# THE ORGANIZERS

Ernst & KARG are the biological and chemical labour groups at Chalmers University of Technology. Our primary mission is to promote cooperations and exchanges between the students and the labour market.

Our aim is to create events where students and companies can meet. We hope to give the students inspiration and insight to their future careers. In addition to the career fair KARM, we also organize field trips, lunch lectures and dinners where students and companies can meet and operate a mentorship program. We also manage the main responsibility for the sponsors agreements on the sections. In short, we function as a link between the students and the labour market.

# WELCOME TO KARM 2018!

It is finally time for this year's KARM - the career fair for the chemical engineering programmes! At the fair you will have the chance to network with companies and organizations, listen to inspiring presentations and much more.

Make sure to take this opportunity!

Best regards  
Ernst & KARG

# OUR PROGRAMMES

1

**Bt**

300 hp  
Biotechnology

A five-year chemical engineering programme with a distinct biotechnological profile. The range of courses includes chemistry, biotechnology and mathematics but also biochemistry, cellular and molecular biology, as well as a chemical engineering knowledge base. The programme is partly theoretical but also partly practical with a lot of experimental and laboratory work. Common specializations are biotechnology, biomedicine and materials chemistry.

A five-year chemical engineering programme and the largest of our four programs. The programme focuses on process technology and the range of courses includes a lot of chemical engineering and mathematics, but also traditional chemistry, such as materials chemistry and analytical chemistry. Many students choose to focus on either process and energy technology or materials chemistry.

2

**K**

300 hp  
Chemistry

3

**Ki**

180 hp  
Chemistry

A three-year programme which gives a good foundation in chemical engineering, both practical and theoretical. The practical elements are of great importance, since the focus is to learn the techniques that will be used in professional life. The range of courses includes chemistry and mathematics as well as chemical engineering, but also courses in environment, economics and communications.

A five-year chemical engineering programme unique to Chalmers that aims to educate engineers with large computational and problem-solving expertise in the chemical engineering field and at the interface between physics and chemistry. The programme is based on joint studies with both Chemical Engineering and Applied Physics. Compared to Chemical Engineering (MSc) the course range consist of equally many chemical engineering courses, but significantly more mathematics and physics and less traditional chemistry.

4

**Kf**

300 hp  
Chemistry and  
physics

# Ready for a jump start?

Are you passionate about sustainability, innovation, safety, and collaboration?

Nouryon is the new name of AkzoNobel Specialty Chemicals. Industries worldwide rely on our essential chemistry in the manufacture of everyday products such as paper, plastics and personal care items. Our employees have ideas on how to build a sustainable future and the drive and passion to realize them. They believe that building long-term relationships and integrity are keys to success. If that describes you, we will gladly make way for your ambitions.

Your partner  
in essential chemistry  
for a sustainable future

# Nouryon

## About us

AkzoNobel has a passion for paint. We're experts in the proud craft of making paints and coatings, setting the standard in color and protection since 1792. Nouryon is the new name of AkzoNobel Specialty Chemicals.

Industries worldwide rely on our essential chemistry in the manufacture of everyday products such as paper, plastics, building materials etc. Before October 1th 2018 AkzoNobel and Nouryon operated as one company with more than 45 000 employees in 80 countries around the world. Today we stand as two separate businesses. Are you passionate about sustainability, innovation, safety, and collaboration? Do you want to grow together with a company that is forward-looking and continuously improving how they work? Then we will gladly make way for your ambitions.

## COUNTRIES

Together we operate in over 80 countries around the world.

We invest in people because  
people equals knowledge

Vi är experter på kemiska lösningar för världens pappers- och massaindustri. Hemligheten bakom våra framgångar är inte enbart ett resultat av långsiktiga investeringar i forskning och utveckling, eller ett nära samarbete med universitet och högskolor. Lika viktigt är att vi har kompetenta och drivna medarbetare med passion för att skapa innovativa, hållbara och lönsamma lösningar som hjälper industrin att möta sina utmaningar – nu och i framtiden.

# A CAREER IN BORREGAARD

Borregaard has one of the world's most advanced and sustainable biorefineries. By using natural, sustainable raw materials, Borregaard produces advanced and environmentally friendly biochemicals and biomaterials that can replace oil-based products. Borregaard also holds strong positions within ingredients and fine chemicals.

Borregaard has 1100 employees in plants and sales offices in 16 countries throughout Europe, Americas, Asia and Africa.

Borregaard places a significant emphasis on research and development and has large and innovative research divisions in organic chemistry and wood chemistry. 100 employees work in R&D, of which 65 employees at the R&D centre in Norway.

### About us

At Borealis in Sweden, we are strengthening our opportunities for industrial partnership in the region and securing Borealis' future competitiveness in Scandinavia, Europe and globally. Borealis, the only polyethylene (PE) producer in Sweden, is located in Stenungsund, 45 km north from Gothenburg. With a Innovation Centre for Research & Development. The Cracker in Stenungsund is one of the most flexible in Europe. With a capacity of 632.000 tonnes ethylene per year, the cracker's main products are ethylene and propylene, which are used to produce high technology high density polyethylene (HDPE), low density polyethylene (LDPE), and Borstar® polyethylene products, primarily for energy and infrastructure applications (pipe and wire & cable). The polyethylene plants' combined capacity is 750.000 tonnes per year.

## About us

The company focuses on the development and commercialization of bioprinting technologies that allow researchers to 3D print human organs and tissues for the development of pharmaceutical and cosmetic products, and in the future, for clinical applications. CELLINK's innovative and patent pending bioink is a biomaterial innovation that enables human cells to grow and thrive such as they would in the natural human body environment. Today, the company's disruptive technology platform is being utilized to print tissues such as liver, cartilage, skin, and even fully functional cancer tumors that can then be used to develop new cancer treatments. The company has, within 12 months, been able to commercialize products in more than 40 countries and sold to more than hundreds of prestigious labs around the world, such as Harvard, MIT, Princeton, and FDA.

# SPCI – nätverket för dig som vill jobba i en **klimateffektiv** framtid

**Hållbara, förnybara, återvinningsbara och nedbrytbara.** Produkter från skogen är framtiden. Sverige består till 70% av skog och den växer! Möjligheterna med materialet är näst intill oändliga och kan bidra till en bättre, mer klimateffektiv värld. Är du intresserad att utveckla intelligenta förpackningar, jobba med energieffektivisering av avancerade kemiska processer eller forska på framtidens miljövänliga materiallösningar så är skogsindustrin något för dig. SPCI kan bli din väg in i branschen!

## Vilka är vi?

SPCI, Svenska Pappers- och Cellulosaingenjörsföreningen har idag ca 2500 medlemmar. Många av dem är civilingenjörer med kemi- eller bioteknisk bakgrund. Alla med intresse för skogsindustrin kan bli medlemmar. Våra medlemmar jobbar t ex på/hos:

- De svenska massa- och pappersbruken
- Universitet, högskolor och F&U-center inom forskningen
- Leverantörer av maskiner, kemikalier, mätutrustning och digitala lösningar för industrin
- Teknikkonsultföretag
- Startups

## Nätverket Ung Kompetens

Ung Kompetens är SPCIs satsning på unga i början av karriären, dvs studenter och unga medarbetare i skogsindustrin. På våra Ung Kompetens-aktiviteter kan du tillsammans med andra studenter träffa unga som jobbar i skogsindustrin samt andra bra företagskontakter och få information och inspiration för framtiden.

*Studentmedlemskap och aktiviteter är gratis för dig som student. Välkommen!*

## About us

SPCI is the network within forest industry och have today approximately 2500 individual members, both in professionals and students. As a part of facing challenges with the branch future supply of competence the association has started with a project called Ung Kompetens. The purpose is to introduce students to the forest industry through arrange collective activities and create networks with and for young co-workers in the start of their career. During this activity students have the opportunity to get a insight of the forest industry and meet future employers och to young co-workers is it a opportunity to wide their network. Student membership in the association is free.

## About us

Our vision; To be the leading producer and seller of CO<sub>2</sub>-aware energy. Our goal is to develop and commercialize functional and environmentally sustainable solutions and deliver these solutions profitably. Each solution must be technically ready for use today. They also have to be ecologically and ethically sustainable as well as logistically feasible. Implementing the vision; Our strong performance in the traditional oil business enables us to invest in the future and to build a solid foundation for realising our vision through renewable energy. We are already recycling waste for fuel, using wind power to produce electricity and drilling wells more than 6 kilometres deep to harvest geothermal energy. Our employees working in the traditional oil business are strategy enablers and employees working in renewable energy are strategy executors – both in equally important roles to reach the goals.

# One molecule can change everything

Perstorp believes in improving everyday life - making it safer, better, more convenient and more environmentally sound for millions of people all over the world. As a trusted world industrial leader, our innovations provide essential properties for products used every day at home and work. You'll find us everywhere from your car and mobile phone to towering wind turbines and the local dairy farm. Simply put, we work to make good products even better.

Perstorp's focused innovation builds on more than 135 years of experience, representing a complete chain of solutions in organic chemistry, process technology and application development.

### About us

For over 130 years, Perstorp has worked to improve the daily lives of millions of people around the world with innovative chemistry. Today we have an annual turnover of 13 billion SEK and have 1,600 employees worldwide, in Asia, Europe and North America. Our specialty chemicals make everything from cars to computers, from sails to shoes, lighter, stronger and safer. Every aspect of our corporate culture is infused with our core values of focused innovation, reliability and responsibility.

# FRAMTIDEN BEHÖVER FLER CHALMERISTER

*"Jag gillar gemenskapen och att vi har kul på jobbet. Det märks att vi alla jobbar mot samma mål."*

*Adna Carlberg, före detta Chalmerist, idag produktionsplanerare.*

*"Preem har fokus på individens kompetensutveckling."*

*Thomas Dolff, före detta Chalmerist, idag processtyrningsingenjör.*

Vill du jobba för framtiden redan idag? Läs mer på [preem.se/karriar](https://preem.se/karriar)

## Website

[www.preem.se](http://www.preem.se)

## Locations in Sweden

We are located in many places in Sweden, including Hisingen and Lysekil.

## About us

We are Sweden's largest fuel company and our vision is to lead the transition toward a sustainable society. We refine and sell gasoline, diesel, renewable fuels and heating oils to companies and consumers. Our two refineries are considered to be among Europe's most modern and environmentally efficient, with an annual refining capacity of more than 18 million metric tons of crude oil. Just over two-thirds of production is exported, which also makes us one of Sweden's largest export companies.

Preem aims to be a safe, inclusive and open workplace offering excellent opportunities for advancement for all our employees. We have nearly 200 different positions at Preem, which means that the expertise in the company runs both broad and deep. We are looking to hire many engineers in the upcoming years.

## COUNTRIES

# Fyra smarta skäl att bli studentmedlem i höst.

BLI MEDLEM IDAG OCH FÅ KRAFTER UTÖVER DET VANLIGA UNDER HELA STUDIETIDEN.

# 1

## Du betalar bara 100 kronor för medlemskapet.

Du betalar bara en gång och det gäller oavsett vad eller hur länge du pluggar. För 100 kronor får du förmåner och tjänster till ett värde av tusentals kronor. Vad sägs om en förmånlig hemförsäkring, rabatt på tidningar, elektronik, resor och exklusiva inbjudningar till några av Sveriges bästa föreläsare? En superdeal för dig som student med begränsat budget.

# 2

## Någon att fråga om allt. Nästan i alla fall.

Vi kanske inte har superkoll på dina tentafrågor, men när det kommer till arbetsliv och karriär kan vi det mesta. Är du osäker på vad som är normalt på extra- eller sommarjobbet, hur ett bra cv ska se ut eller vad du ska begära i ingångslön? Kontakta oss. Vi vet.

# 3

## Vi är störst. Och det tjänar du personligen på.

Unionen är Sveriges största fackförbund för tjänstemän i det privata arbetslivet. På svenska betyder det att de flesta ingenjörer, ekonomer, jurister och chefer som inte jobbar inom kommun eller landsting väljer att bli medlemmar hos oss\*. Och ju fler vi blir, desto bättre blir det. Att vara många är liksom hela poängen med facket. Det betyder också att vi finns nästan överallt i svenskt arbetsliv. Därför har vi grym koll, oavsett var du hamnar.

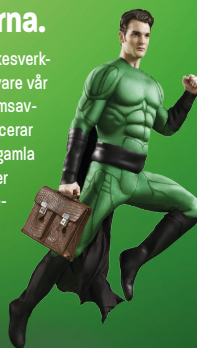

# 4

## Vi har de bästa examenspresenterna.

När du tar examen och uppdaterar ditt Unionenmedlemskap till yrkesverksamt betalar du bara 100 kronor i medlemsavgift första året. Tack vare vår **NY PÅ JOBBET-RABATT** sparar du upp till 2 600 kronor (ord. medlemsavgift är ca 2 700 kronor). När du uppdaterar ditt medlemskap kvalificerar du dig dessutom för vårt **LITTERATURSTIPENDIUM**. Skicka in dina gamla kvitton för kurslitteratur eller annat kursmaterial, så ger vi dig över 3 000 kronor för dina utlägg. Varför? Eftersom kunskap och kompetens är något av det viktigaste vi vet här på Unionen.

Bli medlem idag och läs mer på  
[unionen.se/student](https://unionen.se/student)

**unionen**  
STUDENT

\*Unionen organiserar bara medlemmar som jobbar på privata företag och organisationer, eftersom det är det vi kan bäst och där vi förhandlar fram anställningsvillkoren. För kommun och stat finns våra systerförbund Vision och ST.
